

Ex. No.: 10	Design a website using AI tools
24.03.2026	

Aim:

To design and develop a responsive website using AI-powered tools for layout generation, content creation, and code assistance.

Objective:

- To understand the use of AI tools in web development
- To generate website structure using AI assistance
- To create UI design, content, and code efficiently
- To improve productivity, creativity, and design quality

AI Tools Used:

- ChatGPT – Used for generating HTML, CSS, JavaScript, and content
- GitHub Copilot (Optional) – Used for code suggestions and auto-completion
- Canva AI / Figma AI – Used for UI/UX design generation
- Wix ADI / Durable – Used for automatic website creation

Procedure:**Step 1: Identify Website Type**

Choose the type of website such as:

1. Portfolio website
2. Event website
3. Business website
4. AI-based application

Step 2: Generate Website Code Using AI

Use AI tools like ChatGPT to generate:

1. HTML structure (webpage layout)
2. CSS styling (design and appearance)
3. JavaScript functionality (interactivity)

Step 3: Design User Interface

1. Use AI design tools like Canva AI or Figma AI
2. Create layouts, color schemes, fonts, and components
3. Export design assets if required

Step 4: Create Web Pages

Develop the following pages:

1. Home Page (Introduction)
2. About Page (Details about website/project)
3. Services/Features Page
4. Contact Page (Form for user interaction)

Step 5: Make Website Responsive

1. Use CSS media queries or Bootstrap
2. Ensure compatibility across:
 - Mobile devices
 - Tablets
 - Desktop screens

Step 6: Add Interactivity

1. Use JavaScript for dynamic features:
 - Button clicks
 - Alerts
 - Form validation
 - Animations

Step 7: Test the Website

1. Open in browser
2. Check:
 - Layout alignment
 - Responsiveness
 - Functionality

Step 8: Refine Using AI Suggestions

1. Improve UI design
2. Optimize code
3. Fix errors
4. Enhance user experience

Code:

Html file

```
<!DOCTYPE html>
<html>
<head>
  <title>AI Website</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
<header>
  <h1>Welcome to AI Web Design</h1>
</header>
```

```
<section>
  <p>This website is generated using AI tools.</p>
  <button onclick="showMsg()">Click Me</button>
</section>
<script src="script.js"></script>
</body>
</html>
```

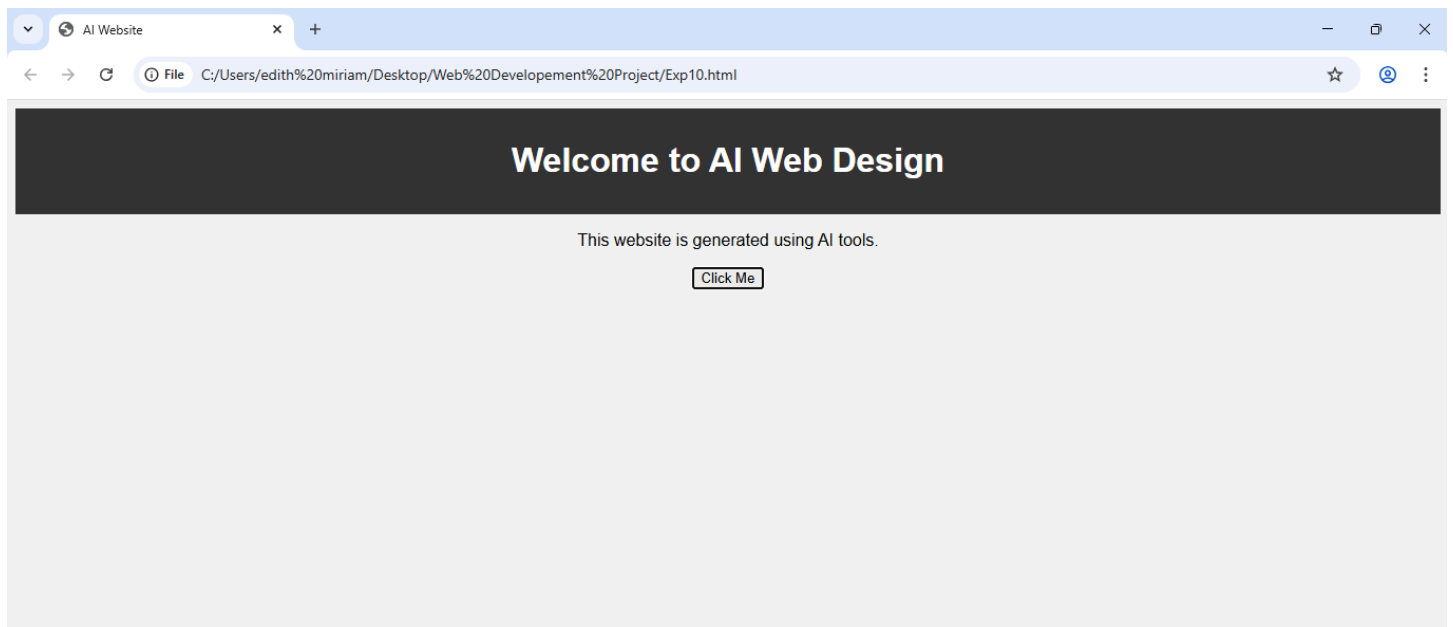

Css file

```
body {
  font-family: Arial;
  text-align: center;
  background-color: #f4f4f4;
}
header {
  background: #333;
  color: white;
  padding: 10px;
}
```

JavaScript

```
function showMsg() {
  alert("AI Generated Website!");
}
```

Output:

Result:

The experiment is successfully completed.
