

Ex. No.: 02	Design a Web Page using HTML and Advanced CSS
13.01.2026	

Theme: Justice World Tour**Aim**

To design and develop an Online Event Management System using HTML and advanced CSS for creating an interactive and well-structured user interface.

To implement responsive layouts and modern styling techniques to enhance usability and visual appeal across different devices.

Description

The Online Event Management System is a responsive web page designed using HTML and advanced CSS to provide a structured and visually appealing interface for managing events. The page begins with a professional header and navigation bar that allow users to easily access different sections such as Home, About, Events, and Registration. A banner section with an image overlay introduces the platform and highlights its purpose. The About section explains the system's role in simplifying event planning and participation. Multiple event categories are displayed using a flexible three-column layout with captions, enhancing visual clarity. Side-by-side content sections present detailed event information with images and descriptive text. The registration section includes a styled form for user sign-up, while the video section offers an event preview for better engagement. Overall, the design uses modern CSS features like flexbox, floating layouts, opacity, and shadows to ensure readability, responsiveness, and an enhanced user experience.

Code

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Justice world Tour</title>

Input & Output

A screenshot of a web browser window titled 'Justice world Tour'. The address bar shows the file path 'C:/Users/edith%20miriam/Desktop/Web%20Development%20Project/event.html'. The main content area displays a registration form for the 'Justice World Tour'. The form has a light blue border and contains the following fields: 'Full Name *' (text input), 'Email Address *' (text input), 'Preferred Event Date *' (date picker with 'dd-mm-yyyy' format), 'Session Preference *' (radio buttons for 'Morning', 'Afternoon', and 'Evening'), 'Ticket Type *' (dropdown menu with '-- Select Ticket Type --'), 'Comments / Special Requirements' (text area with placeholder 'Enter any special requests here...'), and 'Upload ID Proof / Photo (image/PDF)' (file upload section with a 'Choose File' button and 'No file chosen' text). A blue 'Register' button is at the bottom.A screenshot of a web browser window titled 'Justice world Tour'. The address bar shows the file path 'C:/Users/edith%20miriam/D...'. Result

A responsive and visually appealing Online Event Management System web page was successfully designed using HTML and advanced CSS. The page effectively displays event details, enables user registration, and enhances user interaction through modern layout and styling techniques.
