

Ex. No.: 03	Responsive Web Design using Bootstrap
14.01.2026	

Theme: Justice World Tour

Aim:

The aim of this project is to develop a responsive and user-friendly Online Event Management System using **Bootstrap** for modern UI design and layout structuring. It focuses on simplifying event planning, registration, and information management through an interactive web interface. The system enhances accessibility, visual appeal, and cross-device compatibility by leveraging Bootstrap's responsive grid and components.

Description:

This experiment involves designing and developing an Online Event Management System using HTML, CSS, and the Bootstrap framework for responsive front-end development. The objective is to create a structured web application that allows users to view event details and register through an interactive interface. The Bootstrap grid system and components such as navbar, cards, modals, and forms were implemented to enhance layout consistency and responsiveness. The system follows a modular design approach to ensure scalability and maintainability. User interface elements were optimized for cross-device compatibility and improved user experience. The overall method demonstrates practical implementation of modern web development principles for real-world event management applications.

Procedure:

1. Create a new HTML file named bootstrap.html.
2. Add the basic HTML5 structure using `<!DOCTYPE html>`, `<html>`, `<head>`, and `<body>` tags.
3. Include Bootstrap CSS and JavaScript files using CDN links.
4. Create a responsive layout using Bootstrap's grid system (container, row, col-*).
5. Add a responsive navigation bar using Bootstrap components.
6. Insert multimedia content such as images, videos, and audio.
7. Create an event registration form using Bootstrap form classes.
8. Apply Bootstrap utility classes for spacing, typography, and alignment.
9. Test the webpage responsiveness by resizing the browser window.
10. Verify that the layout adapts properly on desktop, tablet, and mobile devices.
11. Save the output and document the results.

Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<title>Online Event Registration Portal</title>
<meta name="viewport" content="width=device-width, initial-scale=1">
<!-- Bootstrap CSS -->
<link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.2/dist/css/bootstrap.min.css" rel="stylesheet">
</head>
<body class="bg-success-subtle">
<!-- Navigation Bar -->
<nav class="navbar navbar-expand-lg navbar-dark bg-dark">
<div class="container">
<a class="navbar-brand text-success" href="#">Tech Innovators 2025</a>
<button class="navbar-toggler" type="button" data-bs-toggle="collapse" data-bs-target="#navbarNav">
<span class="navbar-toggler-icon"></span>
</button>
<div class="collapse navbar-collapse" id="navbarNav">
<ul class="navbar-nav ms-auto">
<li class="nav-item"><a class="nav-link" href="#">Home</a></li>
<li class="nav-item"><a class="nav-link" href="#">Highlights</a></li>
<li class="nav-item"><a class="nav-link" href="#">Register</a></li>
</ul>
</div>
</div>
</nav>
<!-- Header Section -->
<header class="text-center bg-dark text-white p-4">
<h1 class="text-success">Tech Innovators Conference 2025</h1>

</header>
<div class="container mt-4">
<div class="row">
<!-- Media Section -->
<div class="col-md-6">
<div class="card shadow">
<div class="card-body">
<h2 class="text-success">Event Highlights</h2>
<h4>Promotional Video</h4>
<video class="w-100 mb-3" controls>
<source src="promo.mp4" type="video/mp4">
Your browser does not support the video tag.
</video>
<h4>Intro Audio</h4>
<audio class="w-100" controls>
<source src="intro.mp3" type="audio/mpeg">
```

Your browser does not support the audio element.

</audio>

</div>

</div>

</div>

<!-- Form Section -->

<div class="col-md-6">

<div class="card shadow">

</div>
<div class="mb-3">
<label class="form-label">Upload ID Proof / Photo</label>
<input type="file" class="form-control">
</div>
<button class="btn btn-success">Register</button>
</form>
</div>
</div>
</div>
</div>
</div>
<!-- Bootstrap JavaScript -->
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.2/dist/js/bootstrap.bundle.min.js"></script>
</body>
</html>

```

Output:

Result:

The developed Online Event Management System successfully provides a responsive and interactive platform for displaying events and managing user registrations using Bootstrap components. The implementation demonstrates improved user experience, structured layout design, and seamless functionality across different devices and screen sizes.
